

ULTRack+

PRODUCT INFORMATION

PRODUCT OVERVIEW

The ULTRack+ is a premium aluminium gallery roof rack designed for professionals who require a strong, secure and versatile roof storage solution. Combining lightweight construction with innovative design features, it is ideal for transporting bulky materials, ladders and sheet goods safely and efficiently.

KEY FEATURES

- Available in anodised aluminium or ultra-durable, scratch/corrosion-resistant black powder coating
- Lightweight aluminium alloy construction
- Integrated T-track rail system across every crossbar
- Includes 2 pairs of adjustable load stops
- Full-width rear roller for easier loading and unloading
- Reinforced side channels for additional strength
- Crash tested to 20G

KEY BENEFITS

- Carries wide loads such as ladders and 8×4 sheets with ease
- T-track system allows quick installation of load stops, eye bolts and roof accessories
- Multiple tie-down points improve load restraint and security
- Rear roller reduces effort when loading heavy materials
- Lightweight design helps minimise unnecessary vehicle weight while maintaining strength

WHY CHOOSE VAN GUARD?

- Over 50 years of British manufacturing experience
- Extensive range of professional van accessories
- Dedicated research and product development team
- Responsive customer service
- Next working day delivery available
- Dedicated account management
