

ULTIBar+

PRODUCT INFORMATION

PRODUCT OVERVIEW

The ULTIBar+ is a premium aluminium roof bar system engineered specifically for individual van models. Its aerodynamic design, lightweight construction and durable finish provide a dependable solution for transporting ladders, equipment and building materials.

KEY FEATURES

- Available in anodised aluminium or ultra-durable, scratch/corrosion-resistant black powder coating
- Aerodynamic profile to reduce wind noise
- Manufactured from anodised aluminium
- Each roof bar tested to 80 kg
- Vehicle-specific fitting using existing mounting points
- Includes adjustable load stops
- Innovative T-slot for accessories
- Optional rear ladder roller available
- Crash tested to 20G

KEY BENEFITS

- Tailor-made for each vehicle for a secure fit
- Corrosion-resistant materials for long service life
- UV-resistant plastic components
- Galvanised and powder-coated brackets for added durability
- Compatible with a wide range of roof-mounted accessories
- Ideal for daily trade use
