

Pipe Carrier

PRODUCT INFORMATION

PRODUCT OVERVIEW

The Van Guard Pipe Carrier provides secure external storage for pipes, conduit, trunking, fascias and other long materials. Manufactured from lightweight anodised aluminium, it protects materials during transport while freeing valuable space inside the van.

KEY FEATURES

- Available in anodised aluminium or ultra-durable, scratch/corrosion-resistant black powder coating
- Weatherproof, durable design
- Fully integrated locking mechanism
- Lockable end caps for added security
- Universal fitting with no drilling required
- Available in lined or unlined versions
- Crash tested to 20G
- Standard 3m length
- The Standard Pipe Carrier holds up to 36 x 15mm tubes, whilst the Maxi Pipe Carrier holds up to 60 x 15mm tubes.

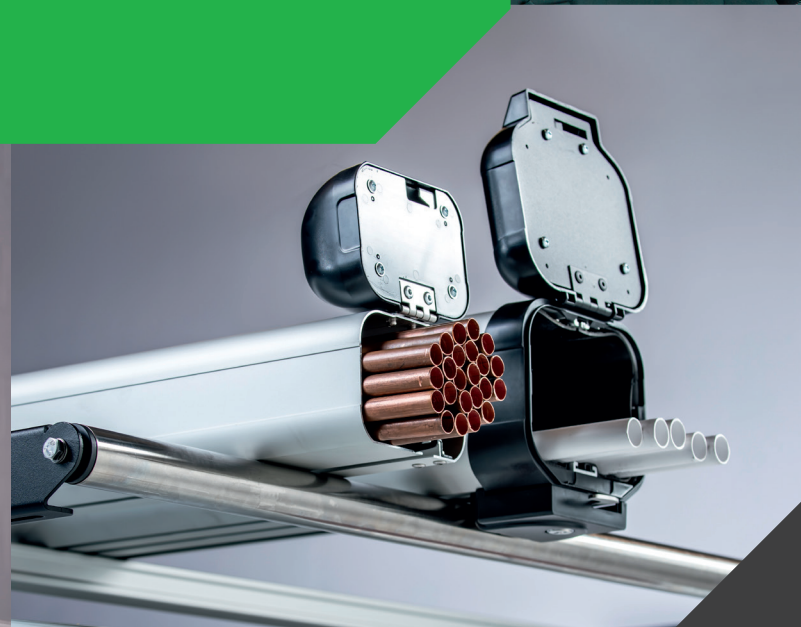

KEY BENEFITS

- Provides dedicated storage for long materials
- Helps prevent damage during transport
- Keeps pipes and conduit separate from tools and equipment
- Optional lined version protects plastic conduit, trunking and fascias from marking
- Suitable for plumbers, electricians and other trade professionals

WHY CHOOSE VAN GUARD?
